REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 1 includes the limitation of a leading edge and a retention rib. There is a handle projecting in a straight line from the retention rib and forming a right angle with the leading edge. The rib further comprises a continuous arcuate section extending from one side of the leading edge to the handle and a substantially straight section extending from the other side of the leading edge.

Robertson (USPN D468106) teaches a dustpan with a similar shape as claimed however Robertson fails to teach a continuous arcuate section extending from one side of the leading edge to the handle. Additionally, the handle does not form a right angle with the leading edge.

The shape of the dustpan of the claimed invention has functionality where the continuous arcuate shape facilitates the transfer of trash or dust into the tray and improves funneling of trash when emptying and the straight section enables the end of the tray to reach difficult to reach places. The shape of the claimed invention is not solely for aesthetic purposes but has functional value and therefore, it would not have been obvious to alter the shape of Robertson's dustpan since there is no teaching or motivation for the functionality of the claimed shape.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
